To Whom It May Concern

PROJECT: Hinze Dam – Stage 3 Upgrade

SUBJECT: Painting Contractor – CHB Painting and Decorating Pty Ltd

CHB was the successful contractor awarded the Metal Works Coating For Exposed and New Pipework Contract on the Hinze Dam Stage 3 Project - a \$390 million upgrade of the primary water supply storage and delivery for the Gold Coast.

They were selected from an experienced group of prequalified contractors, the value of the contract works was \$536,000.

The works included the preparation by blasting of existing pipework up to 1500mm diameter, the Metal Work Coatings application, and the internal and external painting of Operational Buildings.

The standards required were very high, with NATA 3rd Party Independent Accredited Inspections and includes the warranty of all coatings for 15 years.

These works were carried out in an existing operational site which included Confined Spaces, scaffolded areas, working from Boom Lifts and Crane Man Boxes.

All of this required high Health, Safety and Environmental Standards, the ability to provide resources to meet programme peaks, and maximum flexibility to work within other construction activities; all of which were provided by CHB.

CHB has consistently delivered their services professionally, to quality, time and safety and I have no hesitation in recommending them.

Yours sincerely,

Jim Swift
