To whom it may concern

Dear Sir,

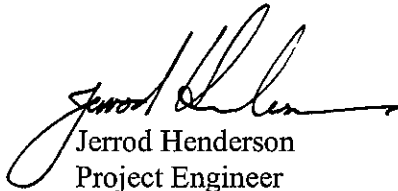

Based on their success at Hinze Dam I recommend CHB Painting and Decorating. I was the supervising Project Engineer for six months whilst the contract work was completed.

CHB Painting and Decorating displayed a high degree of work ethic, scheduling flexibility and quality. During time on site they were approached about further opportunities and this was based on their observed current performance. In addition to their previous experience, CHB Painting and Decorating continued to learn and develop the product and its application to suit the site requirements.

Charles is also a dependable team player. He has a mature and professional outlook to ensure a logical and practical solution. Charles successfully ensured productivity was crewed appropriately whilst managing site conditions and access to work areas.

CHB Painting and Decorating would be an asset to any project completing industrial coating work, and I am happy to give my recommendation.

Sincerely,

Jerrod Henderson
Project Engineer
