

To whom it may concern

CHB Painting & Decorating Pty Ltd was engaged by the Hinze Dam Alliance in 2011 to complete works as part of the Hinze Dam Stage 3 upgrade. This included the extensive repair of existing coatings on large diameter pipework, refurbishment of an existing pump station building and miscellaneous onsite works.

Access was restricted in most areas and a variety of permits, scaffolds and elevated work platforms were utilised including confined space entry, swinging stages and long reach knuckle booms.

The works were suitably planned and resourced to ensure that they could be carried out safely and adhere to site rules. Working across the job site, CHB communicated well with other work crews and management and despite periods of poor weather the work was completed on schedule with all areas left clean and tidy.

I would happily contract CHB on future projects and recommend them for any industrial or commercial coating works.

Regards
